

# Anishi Desai's Portfolio

The portfolio will include details about me surrounding my personal life, my education life, and my skills/projects I can present about myself to hiring managers and curious individuals.

The purpose of this portfolio is to highlight all the accomplishments that I have achieved throughout my life and my career path. It is also to talk about me as a person and show that I have interacted with several communities outside of an educational standpoint. Making this portfolio will create a centralized area of accessing all the information about me for hiring managers and/or curious individuals to look at in order to gain a better understanding of what I know and what I am planning to gain out of the upcoming years of my life.

This service is unique because it doesn't heavily focus on other individuals besides its intended person, which allows for the viewer to gain the most information of what this person is like without any distractions.

## Personas

1. Hiring Managers
2. Co-workers and peers
3. Curious individuals looking for inspiration

## Comps

1. Wix.com ([www.wix.com](https://www.wix.com))
2. Squarespace.com ([www.squarespace.com](https://www.squarespace.com))
3. GitHub Pages (<https://pages.github.com/>)

Welcome to my portfolio!

My name is Anishi Desai, its wonderful to meet you. Here, you'll find a glimpse of my journey and skills. I've cultivated expertise - each step has been driven by curiosity, and I am passionate about bridging the gap between challenges and solutions.

My goal is to bring a thoughtful, detail-oriented approach to every project I undertake, and inspire others around me to do the same. My focus lies in exploring innovative ways to improve processes, solve problems, and create a meaningful impact no matter where I am through technology, collaboration, or strategic insights.

Me at the 2024 SWE Conference in Chicago

A little bit about me...

I am from the suburbs of Chicago, Illinois, where I have lived for a majority of my life. I have one twin sister who attends University of Iowa on the Pre-Med track, which is very exciting for her.

I've been apart of several sports during my life, starting from the young years at that. My sister and I played tennis at first from my mom's influence of being a collegiate tennis player, but we had different goals with a different sport: soccer. I was apart of that sport for around 11 years before stopping just after high school to join Track and Field and Cross Country. Following high school, I picked up Ultimate Frisbee as a college, which has led me to joining a women and men's mixed club within nearby suburbs at home!

Throughout my journey, I've had the opportunity to work through hands-on internships and gain great value from these experiences.

EducationExperienceProjects

Education

I am currently pursuing my undergraduate degree in Information Science at Michigan State University, with a minor in Business. Throughout my time at MSU, I have been actively involved in various student organizations that align with my interests and academic pursuits.

- AI Club
- CSUCU Club
- Women's Ultimate Frisbee Club

Experience

CSUL, RTS Supply Chain Intern at AMN/Vis

During this internship, I worked closely with AMN/Vis's supply chain team on digitalization projects. One of my main responsibilities was leading decommissioning projects, where I worked to retire old systems and processes.

IT Operations Intern at AMN/Vis

As an IT Operations intern, I focused on supporting business technology systems, specifically within supply chain and global digital logistics.

Projects

Check out my projects on GitHub and through Nifty to see the finished products!
